

Team 26

MEETING FOUR 3/3

3 MARCH 2023 / 1 PM / GEORGE HOLT LAB 1

ATTENDEES

Navinder Waraich, Natalia Witkowska, Naomi Durkin, Jason Lika, Benjamin Cuello-Wolffe, Conlan Roberts

AGENDA

Last Meeting Follow-up

- Look over the Gaant Chart
- Discuss Implementation

New Business

- Set everybody up on the Github and connect it to Xcode
- Instruct everybody on how to push and pull code so we can work collaboratively on the project
- Start developing the app

ACTION ITEMS

1. Apologies

- No apologies, all team members are present for this meeting

2. Approval of minutes for last meeting

- Read through the last meetings minutes together and agreed that they were a true and accurate reflection of the last meeting

3. Set everybody up on gitHub

- Ben set up a gitHub page for all of our project files to be uploaded to and to allow us to work collaboratively on the code. All of the previous meeting notes and the requirements analysis have been added to the gitHub page. A quick crash course was given on how to use and navigate gitHub so that everyone has a basic understanding and can now use it to work on the project. Everyone

set up developer codes on their accounts to allow for the collaboration when using XCode

4. Pushing and Pulling

- Pushing and Pulling using XCode and gitHub was explained to those who have never used the platforms before. A step by step was given and then members were tasked with pushing their own code and pulling code written by others to make sure that everyone understood and could get it to work.
- The pulling and pushing was successful for all members and from this we can successfully collaboratively code on the project

5. Start developing the app

- We started building the foundation of the app
 - By making some view controllers

NEXT MEETING

End of next week at George Holt Lab 1, day and time TBC
