

Team 26

MEETING THREE 24/02

24 FEBRUARY 2023 / 2:00 PM / Harold Cohen Library

ATTENDEES

Navinder Waraich, Natalia Witkowska, Naomi Durkin, Jason Lika, Benjamin Cuello-Wolffe, Conlan Roberts

AGENDA

Last Meeting Follow-up

- Approval of last meeting's minutes
- Review of Requirements Analysis

New Business

- Workflow of our last application
- Discussion of Implementation
- Update Gantt Chart

ACTION ITEMS

1. Apologies

- No apologies, all team members are present for this meeting

2. Approval of minutes for last meeting

- Read through the last meetings minutes together and agreed that they were a true and accurate reflection of the last meeting

3. Review of Requirements Analysis

- Read through and reviewed the final documentation together so we are all clear on what exactly we need to do to start developing the software

4. Go over Canvas pages

- We went over canvas pages listed under implementation and discussed how our presentations need to look and good writing

5. Workflow of our application

- The application will open with a welcome screen the first time the user uses the app but when the user opens the app after that the app will open to the home page (map view)
- The user will be able to switch between the map view, the journal view and the plan view using a tab bar. The user may add new journal entries from the map view and the journal view by pressing the plus icon in the top right corner.
- By pressing the plus icon, it will add a journal entry to their current location (if they have allowed their location to be accessed). If they want to add a journal entry to a specific location they can do that by long pressing on the map view.
- The user may add new plans from the plan view from pressing the same plus icon.
- In the top right corner of the page the user will be able to select the settings icon which directs them to a settings page. On the settings page, the user can customize the theme (i.e. switch between light and dark mode) and view the terms & services.

6. Discussion of Implementation

- We spoke about how we plan to implement the app and agreed to meet in the Mac Labs at least once a week so we can be on the same page about where we are with implementation
- Ben created the Github page where we will store all of our documents and code so we can work collaboratively on the application
- We are planning to work on separate screens, we will have 2 people work on each screen together

7. Gantt Chart Review

- Natalia updated the Gantt chart with our current progress

NEXT MEETING

Next week, day and time TBC
